Profile

Senior level designer / animator with over 20 years of experience in broadcast post-production working with Adobe After Effects, Cinema 4D, Photoshop, and Illustrator. I have tons of experience with movie trailer and video game trailer motion graphics as well as DVD & Blu-ray interface design.

My skills include advanced After Effects 2.5D camera scenes and 3D integration between After Effects and Cinema 4D. Motion tracking and repairing scenes is a total breeze but I'd rather be creating cool new animation. Also, I've been learning Cinema 4D particle systems and TurbulenceFD software.

Specializing in short-form editing and motion graphics, I have the experience to know what the client really wants. I'm able to work on-site, from my home studio, or even lead a team of artists on large scale projects.

Work Experience Highlights

Hammer Creative

Video Game and Movie Trailers

- Lego Movie Video Game TV Commercials
